SAMPLE PATIENT1  
123 MAIN ST  
NASHVILLE, TN 38558  
DATE OF BIRTH: 2/2/1972

Subjective:

SAMPLE stated Primary Complaint of bilateral Lower Back of moderate severity and pain constant and better since last seen. Using a scale of 0 to 10 ( with 0 being no pain and 10 being unbearable pain), the patient rated their pain as a 3. SAMPLE stated that they are overall feeling Better since the last treatment with their pain symptoms. Patients symptoms are improving by 30 percent. When the patient was asked what aggravates their condition, they responded that the following activities make the pain worse: the symptoms are always there, bending, standing for more than 5 minutes.SAMPLE also informed me that the Symptoms Improve when they receive Chiropractic Adjustments, Use Ice on affected area, when mild stretches to the affected area are performed., Rests or sleeps.
